Experience

Turbolab Technologies — *ScrapeHero* Jun 2024 - Present

Platform Engineer *Jun 2026 - Present*

Django, React/TS, Nomad, Traefik, GitLab CI, Ansible, Vault, OpenTelemetry, Grafana, MCP

- Own the infra team's **internal operations platform**: one place for inventory, alerting, incidents and uptime across **200+ servers**.
- Delivered **OpenTelemetry tracing** across **3 production services** via a shared Python library, linking every Sentry error to its trace.
- Built an **MCP server (25+ tools)** so engineers query the fleet from Claude Code, plus an **LLM agent** that triages new alerts.
- Automated **vulnerability scanning of 200+ servers** with Ansible and Vault-signed SSH, alerting on new CVEs and attacks.

Software Engineer (Intern → Associate) *Jun 2024 - Jun 2026*

Python, Django, DRF, GraphQL, Kafka, Redis, Stripe, OpenAI, React

- Cut **duplicate alerts by 82%** (592 → 107 over 12 weeks) on the core data platform with deterministic dedup.
- Rebuilt real-time credit metering as an **atomic Redis Lua script**, cutting about 10 SQL/Redis calls per request to 1.
- Built **Stripe billing** end-to-end, with lock-protected auto-recharge that prevents double charges.
- Made a **Kafka** event pipeline idempotent, eliminating duplicate events and double processing.
- Lead developer on an **LLM review-intelligence SaaS** (OpenAI, structured output, result caching).

Open Source

PyPI Warehouse — *codebase powering pypi.org* 2 merged PRs

- Improved collaborator notification emails (PR #19430, PR #19458) with project/user links and a role FAQ link, i18n-safe.
- Open PR: fixing HTML heading hierarchy on project pages for WCAG accessibility.

Projects

KKMA Event Tracker 2026

Cross-platform mobile app *React Native, Expo, Supabase, NativeWind*

- Built a mobile app for event management and member registration with admin tabs and infinite-scroll lists.
- Integrated Supabase for auth and data; shipped Android builds via EAS.

Education

Government Engineering College Palakkad Graduation date: Jun. 2024
B.Tech. in Computer Science and Engineering ***CGPA: 7.3/10***

Skills

Languages: Python, JavaScript/TypeScript, SQL, C, Bash

Backend & Data: Django, DRF, GraphQL, FastAPI, Celery, Kafka, Redis, PostgreSQL, MySQL, Elasticsearch

Frontend: React, React Native (Expo), Next.js, Tailwind, TanStack Query, Zustand

Platform & Infra: Nomad, Kubernetes, Docker, Traefik, Ansible, Vault, CI/CD (GitLab CI), Nginx, Kong, AWS S3

Observability: OpenTelemetry, Tempo, Grafana, Prometheus, Zabbix, Sentry

AI: MCP, LLM agents, OpenAI & Anthropic APIs, prompt engineering, Claude Code

Certifications: Python for Data Science — NPTEL.
